## How to figure Door Size

Ideal door size overlaps tack board 1", above base of grade board 2", below concrete floor 1 1/2".

We will figure the dimensions out for clearance, adjustments, ride height and pre-drill framing.

**Expected Delivery Date (Give us 3-6 weeks):** \_\_\_\_\_

**Is this a (circle one):** New Construction \_\_\_\_ Existing Remodel \_\_\_\_

**Height from bottom of grade board to bottom of door opening header:** \_\_\_\_\_

**Height of where you want bottom of door in relation to bottom of grade board:** \_\_\_\_\_

(Bottom of door is typically 2-3" above bottom grade board)

**Existing door; height of where door slides at base to bottom of track, tight measurement:** \_\_\_\_\_

(If existing door is present and clearances are correct use that size for new door)

**Door Opening Width:** \_\_\_\_\_

**Split Door Center Guide (Circle one):** Stub Post \_\_\_\_ Concrete Anchor \_\_\_\_

**Job Date (When you need the door by):** \_\_\_\_\_

**What series of door (E-Series or 100-Series):** \_\_\_\_\_

Recommend 2x8 through opening for Face Mount Track and 2x6 through opening with Top Mount Track flush with top of track board. Door widths are standard nominal dimensions 6'; 8'; 10'; 12'; 14'; 15'; 16'; 18'; 20'; 24'; 30'. Cut Charge is \$50 per door to cut

Ideal door opening width for split doors is 5" overall narrower than door panel width; 3-8" lap will work but isn't ideal.

Example: 30' door is 29'7" opening. Single door ideal width overlap is 6".

<b><u>Door Size</u></b> Width X Height Single or Split	<b><u>Latch Options</u></b> Standard Handle Included Keyed/Stainless (extra)	<b><u>Track Options</u></b> Top Mount (2x6 board) Face Mount (2x8 board) Track board size	<b><u>Notes</u></b> Steel/Post Frame Name/PO EzGlide Rollers or Bearing with J-Channel
