

DOORS THAT WORK

THE INCREDIBLE SWING DOOR

WWW.IBEAMDOOR.COM

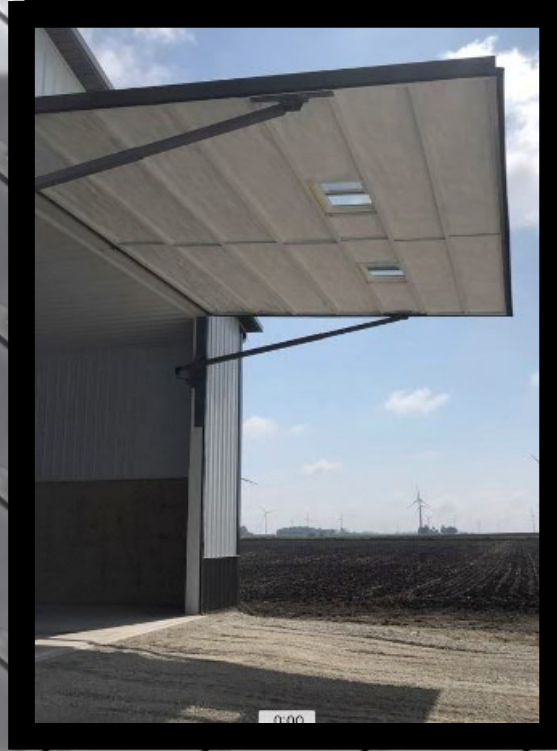

Wind Ratings

Open: up to 80 MPH

Closed: 120 MPH

SAFETY LONGEVITY VALUE

Why it's Incredible:

- Fully automated door system that integrates door industry standard operating system
- Graceful operation takes intimidation and safety factor to another level.
- Zero headroom loss.
- Battery backup (24volt)included.
- Extremely low stress on your building. Zero jolting and no sudden stop backlash energy
- Infinite options for covering door with metal, wood, concrete or glass materials.
- Easily bolts to any existing structure and accommodates challenging door situations.
- Ball screw jacks make the door much safer. Outperforms cable, straps or hydraulic lift
- Smart controls runs door at safe speeds; has built in torque load detection to detect obstruction or imbalance of door.
- Seals against outside of building and is a tighter seal than any other door.
- The light weight yet strong aluminum frames make the door easy to customize, safer to operate, puts low stress on the building, and less friction on moving parts.
- Any commercial door control can easily be integrated into system giving you 1000's of options. Phone app compatible with WIFI.
- Up to R40 insulation in frame and interior steel liner can easily be attached.
- 10-year warranty on structure
